Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

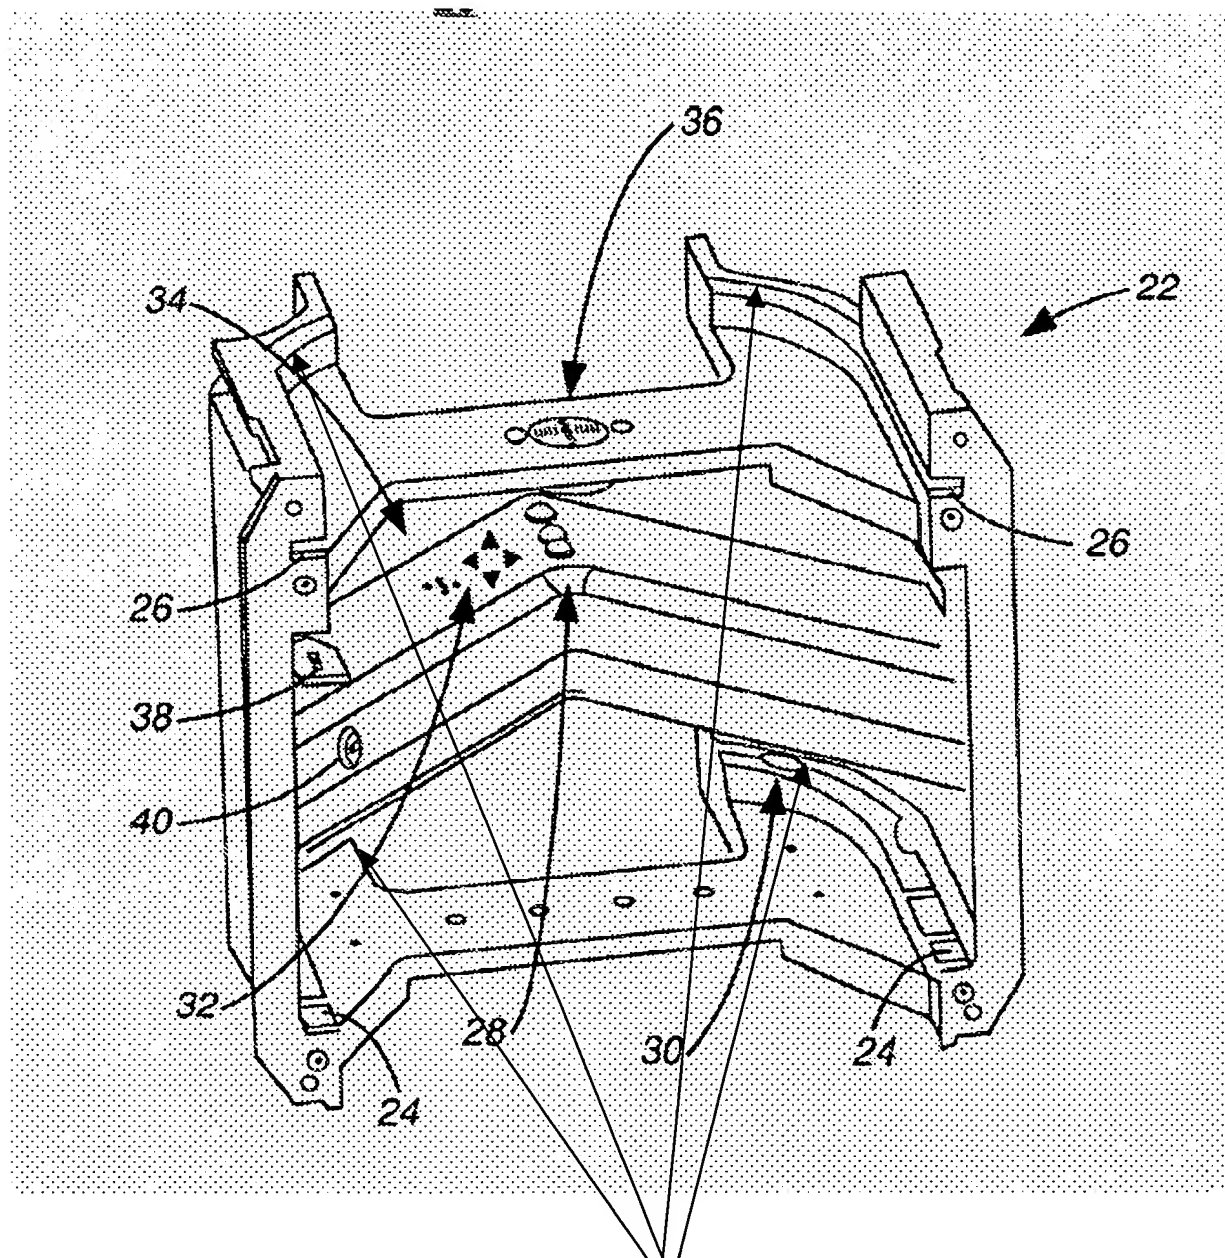

1. The amendment filed 9/30/04 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shatas in view of Beckhart et al. Shatas discloses all the limitations of the claims, but it does not disclose a plurality of sensors located in a housing in a front panel of a cassette. However, Beckhart discloses a similar device that includes a plurality of sensors (30, see col. 2, lines 52-53, 84, 86, 88, 90) located in a housing in a front panel (see Fig. 1, reproduced on the following page) of a cassette for the purpose of aligning a robot arm so that a semiconductor wafer does not bump into the walls of a cassette (see col. 2, lines 13-15). It would have been obvious for a person of ordinary skill in the art at the time of the applicant's invention to modify Shatas by utilizing a plurality of sensors located in the housing in the front panel of the cassette, as disclosed by Beckhart, for the purpose of aligning a robot arm so that a semiconductor wafer does not bump into the walls of a cassette.

Front Panels

Response to Arguments

4. Applicant's arguments filed 9/30/04 have been fully considered but they are not persuasive.
5. The applicant states that Beckhart does not disclose an optical detector housing mounted in a front panel of a cassette. In response, see Fig. 1 as reproduced above illustrating an optical detector housing (30) mounted in a front panel of the cassette.
6. The applicant states that Beckhart is not capable of detecting the position of a wafer edge portion. In response, see at least col. 2, lines 14-16.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
